LEMENT FOR 1975 TO AGRICULTURAL ECONOMIC REPORT NO. 138  
DEPARTMENT OF AGRICULTURE • ECONOMIC RESEARCH SERVICE

Supplement for 1975 to

## FOOD CONSUMPTION, PRICES, AND EXPENDITURES

National Economic Analysis Division  
Economic Research Service

### INTRODUCTION

This supplement revises and updates through 1975 the statistical information contained in *Food Consumption, Prices, and Expenditures*, issued July 1968.<sup>1</sup> Most tables begin with data for 1960 and include any earlier revisions in footnotes. Data are reported as of August 1976.<sup>2</sup>

The updated tables in this report carry the same numbers as in the original bulletin. However, several tables have been omitted because no new information is available. Table 108 has been expanded to include an estimated breakdown of food expenditures at home and away from home.

Footnotes to the tables in this report are reasonably complete but omit detailed source notes carried in the original tables. Data for Alaska and Hawaii are included unless otherwise noted. Military purchases include quantities fed to civilians in overseas areas. A complete description of sources of data and methodology was included in *U.S. Food Consumption, Sources of Data and Trends, 1909-63*, SB-364, issued June 1965. That bulletin, now out of print, is available for reference in most agricultural libraries.

Most consumption, supply, and utilization data in this report are benchmarked to information from

the Census of Agriculture and the Censuses of Manufactures and Business. Thus, quantity data are subject to some revision as more comprehensive data become available. Data on food expenditures—from the Commerce Department's National Income Accounts—are normally revised each year for the preceding 4 years. In addition, periodic revisions are made when the whole system of National Income Accounts is revised. Price data from the Bureau of Labor Statistics are regarded as final.

### ACKNOWLEDGEMENTS

Data in this report represent the combined efforts of many people. Commodity specialists and their staffs in the Commodity Economics Division (CED) of the Economic Research Service, USDA provided the basic supply, utilization, and per capita consumption data for most products of agriculture. Similar data for fisheries products were provided by the National Marine Fisheries Service, U.S. Department of Commerce. The annual nutritive value data are computed by the Consumer and Food Economics Institute of Agricultural Research Service, USDA based on per capita consumption data.

Helen Cadena and Sandra Hebert of the Food Consumption, Demand, and Prices Project of the National Economic Analysis Division (NEAD) compiled the per capita food consumption estimates and developed the food consumption indexes under the supervision of Larry V. Summers. Assisting in the preparation of this report were Laura Blanciforti, Fredericka Bunting, and Anthony Gallo.

<sup>1</sup>Single copies of *Food Consumption, Prices, and Expenditures*, AER-138, may be obtained free from the Division of Information, Economic Research Service, U.S. Department of Agriculture, Washington, D.C. 20250.

<sup>2</sup>Recent data on per capita food consumption, income, food expenditures, and prices are published in the latest issue of the *National Food Situation*. The report, issued quarterly, also carries outlook for the coming 3 to 6 months. The preliminary outlook for 1976 is reported in the November issue.

## TABLES

Table	Brief Title	Supplement page	Table	Brief Title	Supplement page
1	Per capita food consumption index.....	2	63	Fruits - continued	53
2	Per capita consumption and related price indexes.....	4	64	Canned fruit.....	53
3	Index price-weights in base period.....	5	65	Canned fruit juices.....	53
4	Relative importance of major food groups.....	8	66	Chilled citrus fruits and juices.....	54
5	Per capita food use of farm commodities.....	8	67	Frozen fruits and juices.....	54
6	All food: Per capita consumption, retail weight.....	9	68	Dried fruits.....	55
7	Conversion factors from primary to retail weights.	10	69	Tree nuts.....	55
	Per capita consumption:		70	Melons.....	56
8	Meats.....	11	71	Vegetables:	56
9	Fishery products.....	11	72	Fresh vegetables.....	57
10	Poultry and eggs.....	11	73	Canned vegetables and potatoes.....	57
11	Dairy products.....	12	74	Frozen vegetables and potatoes.....	57
12	Food fats and oils .....	13	75	Canned baby food.....	58
13	Melons.....	13	76	Canned soups.....	58
14	Fruits-summary.....	14	77	Potatoes.....	58
15	Fresh fruits.....	15	78	Sweetpotatoes.....	58
16	Canned and chilled fruits.....	15	79	Dry edible beans.....	59
17	Canned and chilled juices.....	16	80	Dry field peas.....	59
18	Frozen fruits and juices.....	16	81	Grains:	
19	Dried fruits.....	17	82	Wheat.....	60
20	Commercial vegetables - summary.....	17	83	Wheat flour.....	60
21	Fresh commercial vegetables.....	18	84	Rye.....	60
22	Canned vegetables, potatoes and sweetpotatoes.....	19	85	Rice.....	61
23	Frozen vegetables, rhubarb, and potato products.....	20	86	Corn.....	61
24	Canned soups and baby foods.....	20	87	Oats.....	61
25	Home garden produce.....	20	88	Barley.....	62
26	Potatoes, sweetpotatoes, dry edible beans, dry field peas.....	21	89	Sugar, cane and beet.....	62
27	Flour and other cereal products.....	21	90	Coffee.....	62
28	Sugars and other sweeteners.....	22	91	Tea.....	63
29	Coffee, tea, and cocoa.....	23	92	Cocoa.....	63
30	Tree nuts, coconuts, and peanuts.....	24	93	Specified condiments.....	64
31	Spices and herbs.....	24		Supply-utilization of farm food commodities:	
	Quarterly consumption per capita:		91	Percentage of total annual net utilization...	65
32	Livestock products.....	25	92	Indexes by component.....	65
33	Meat.....	26	93	Relative importance of major groups.....	66
34	Poultry and eggs.....	27		Volume of farm marketings and home consumption:	
35	Dairy.....	28	94	Indexes.....	66
36	Fats and oils.....	29	95	Relative importance of major groups.....	67
37	Sugar, corn sweeteners, coffee and cocoa beans.....	30		Retail prices:	
38	Nutrients available per capita per day.....	31	96	Retail food price index.....	67
39	Percentage of nutrients contributed by major food groups.....	32	97	Major groups and individual items, indexes...	68
40	Per capita consumption of food, by major groups.....	40	98	Individual items, cents per unit.....	70
	Supply utilization:		99	Relative importance of items.....	71
41	Meats.....	41	100	Quarterly indexes.....	71
42	Edible offals.....	42	101	Selected cities, indexes.....	72
43	Commercial fishery products.....	43	102	Seasonal adjustment factors.....	73
44	Chicken.....	44	103	Selected countries, indexes.....	75
45	Turkey.....	44		Market basket of farm food products:	
46	Eggs.....	45	104	Indexes of total food products.....	75
	Dairy products:		105	Indexes by food groups.....	75
47	Total milk equivalent.....	45	106	Wholesale price indexes.....	76
48	Total milkfat content.....	46		Income and expenditures:	
49	Total, solids-not-fat.....	46	107	Expenditures for food and alcoholic beverages.....	77
50	Cheese.....	46	108	Food expenditures related to income.....	77
51	Condensed and evaporated milk.....	47	109	Quarterly food expenditures related to income.....	78
52	Dry whole milk.....	47	110	Food as proportion of private consumption expenditures, selected countries.....	79
53	Nonfat dry milk.....	47	111	Total marketing bill, farm value, and consumer expenditures, by commodity.....	79
54	Frozen dairy products.....	48	112	Food expenditures and income, by family size, urbanization, and region.....	80
55	Butter.....	48	113	Per capita income and food expenditures of nonfarm families and single consumers, by family income, family size, and region....	80
56	Fats and oils: Total (including butter).....	49	114	Changes in household use of food.....	80
57	Lard.....	49	115	Money value of food per capita, by income group, urbanization, and region, one week in spring of 1965.....	80
58	Margarine.....	49	116	Household expense for food away from home, spring 1965.....	80
59	Shortening.....	50	117	Food and beverage sales by kind of business, retail trade, 1967.....	80
60	Other edible fats and oils.....	50	118	Population.....	80
61	Peanuts.....	50			
62	Fruits:				
	Fruits used fresh.....	51

1/ Quantities of individual foods, measured in pounds equivalent to the form sold at retail food stores (approximately equal to those in table 6), combined into indexes using average retail prices in 1947-49 through 1954 and prices in 1957-59 beginning with 1955 (table 3); indexes linked at 1955.

2/ Includes edible offal and all pork.

1/ Consumption indexes derived from data shown in table 1. Retail price indexes derived from data in table 96.  
2/ Deflated by the Consumer Price Index, all items.

3/ Chicken only through 1963; thereafter includes turkey.

4/ Preliminary. 5/ Includes butter. 6/ Fats and oils, excluding butter. 7/ Cereal product components only. 8/ Excludes noncaloric sweeteners. 9/ Sugar and sweets. 10/ Composite retail price index for regular and instant coffee derived by ERS.

Table 3.—Per capita food consumption index: Price weights and relative importance of items, 1947-49 and 1957-59

All food			323.7598	100.0								

1/ Retail weight equivalent.

2/ Value aggregates derived by multiplying average quantities of individual foods by retail prices; 1947-49 average prices used through 1954, 1957-59 prices thereafter. In computing the index, value aggregates for each of the three years in the two periods were averaged.

3/ Excludes quantities used in other dairy products.

4/ Less than 0.05 percent.

5/ Weighted average of processed and nonprocessed products. See U.S. Food Consumption (7, p. 13) for estimated product proportions, derived from Census of Manufactures data, used in computing the index.

6/ Cane, beet, and corn sugars; excludes amounts used in frozen and canned fruits and juices, canned vegetables, condensed milk, and frozen dairy desserts.

7/ Refiners sirup excluded in 1947-49 data.

8/ Price of roasted coffee adjusted to green bean equivalent.

9/ For 1947-49 quantity is in terms of cocoa beans and retail price of cocoa powder is adjusted to a bean basis. For 1957-59, quantity is in terms of chocolate liquor and retail price on this basis is estimated from cocoa powder and butter prices.

Table 4-- Per capita food consumption index: Relative importance of major food groups, average 1957-59, annual 1967 and 1975 1/

1/ Retail weight data are taken from tables 8-31. Final consumer products from a combination of primary food groups, such as bakery products, are measured and reported in the form of their primary ingredients, such as flour, shortening, and eggs. Civilian consumption only. 2/ Includes game and edible offal. 3/ Includes 2.9 pounds per capita of game fish in 1960; 3.0 pounds thereafter. 4/ Includes product weight of butter and margarine; other items in terms of fat content. 5/ Preliminary. 6/ Includes consumption of home garden produce, table 25. 7/ Excludes estimated quantities of meat, poultry, and fish base soups duplicated elsewhere. 8/ Soya products approximated at 1.3 pounds until 1973. 9/ Corn sugar and sirup are with sugars and other sweeteners. 10/ Excludes sugar used in production of canned and frozen fruit, canned fruit juices, canned vegetables, and unskimmed sweetened condensed milk. 11/ Includes spices and herbs from table 31. 12/ Data have been revised to reflect conversion from fresh weight equivalent to processed weight for dehydrated potatoes, potato chips and shoe strings.

1/ These factors were based on information from various sources. These factors were first assembled during World War II. Later, they were published in Conversion Factors and Weights and Measures for Agricultural Commodities and Their Products, (6) and its predecessor. Current revisions were based on special industry surveys and appraisals by commodity specialists.

2/ The points in the marketing system at which primary data are obtained are described in U.S. Food Consumption (7, chapter 6).

3/ Unless otherwise noted, a straight-line interpolation was made for the 9-year intervening period.

4/ Early factor used through 1953; later factor used in 1963 and thereafter; interpolation made for 1954-62.

5/ Ready-to-cook derived from liveweight using a factor of 0.68 prior to 1947; thereafter it was increased gradually to 0.72 in 1958 and beyond.

6/ Ready-to-cook derived from liveweight using a factor of 0.75 prior to 1956 and 0.76 for 1956 and 1957; thereafter it was increased 1 percentage point per year until 0.8 was reached in 1961.

7/ Factor of 0.96 used in 1942-46 to cover additional loss resulting from shortage of wooden cases during the war period.

8/ Includes fats and oils in cooking and salad oils, in salad dressings, mayonnaise, in bakery products, and for minor uses such as fish canning. To avoid duplication with other foods, no attempt was made to put data on actual weight basis.

9/ Roasted.

10/ Factor of 0.278 used through 1961, 0.303 used for 1962, 0.333 used for 1963 and beyond.

11/ Chocolate liquor equivalent of cocoa and chocolate (53 percent fat content). Prior to 1925 a factor of 0.737 was used.

12/ Factor raised 0.01 point per year beginning with 1961 and reaching 1.00 in 1965 to allow for change of imports from stem to box basis.

1/ Civilian consumption. Includes processed meats on a fresh basis. Carcass weight converted to retail weight equivalent using factors indicated in table 7. 2/ Approximately at wholesale level of distribution. 3/ Approximation of game birds and mammals and commercially raised rabbits. 4/ Net canned weight; federally inspected only; excludes soups. Canned meat is included in total skeletal meat. 5/ Preliminary.

1/ Civilian consumption. 2/ Based primarily on information from Government-regulated fluid milk markets. 3/ Includes butterfat, farm weight for farm consumption, distribution weight for nonfarm. 4/ Includes cream in terms of whole milk equivalent. 5/ Excludes pot and bakers' cheese. 6/ Includes evaporated and condensed buttermilk. 8/ Preliminary. 9/ Includes only the dairy component of frozen desserts and excludes nonfat dry milk used in dairy products other than frozen desserts. 10/ Excludes butter. The inclusion of butter would add 0.5 to 1.5 quarts.

1/ Excludes quantities produced in home gardens. Conversion factors used to obtain retail weight from farm weight are indicated in table 7.

2/ Includes honeydew and honeyball melons.

### 3/ Preliminary.

Table 14.--Fruits, summary: Per capita consumption, farm and retail weights, 1960-75 1/

1/ See tables 15-19 for individual items. Civilian consumption. 2/ Crop year beginning October or November prior to year indicated. 3/ Fresh weight equivalents derived from processed products using constant conversion factors for individual fruits, except juices for which factors have been adjusted to allow for increased yield. 4/ Pack year beginning November prior to year indicated. 5/ Item produced commercially in Florida; excludes quantities reconstituted locally. Data for pack year beginning September prior to year indicated. 6/ Farm weight data exclude apples from noncommercial areas; retail weight data include them. 7/ Preliminary. 8/ Date on pack year beginning midyear of year indicated.

1/ Calendar year except for citrus fruits for which season starts October or November prior to year indicated. Civilian consumption. Conversion factors used to derive retail weights from farm weights are indicated in table 7. 2/ Farm weight data include only apples from commercial areas sold and used in farm households. Retail weight data include all apples. 3/ Loss factor reduced from 5 percent to zero over 1960-65 period to allow for change from stem to box basis of imports. 4/ Preliminary. 5/ Less than 0.05 pound.

1/ Civilian consumption. Calendar year basis except for dry field peas for which the year begins in September of the year indicated. Data exclude home-garden produce. Factors used to convert from farm weight to retail weight are indicated in table 7. 2/ Includes processed sweetpotatoes other than canned.

3/ Cleaned basis. 4/ Approximations. 5/ Preliminary.

1/ Consumption of most items is measured at the processing level. Excludes quantities used in alcoholic beverages. Civilian consumption. 2/Semolina and durum flour in products such as macaroni, spaghetti, and noodles. 3/Estimated on basis of data in Census of Manufacturers plus an allowance for grind for farm home use. 4/Milled basis. Rice consumption for year beginning August previous to year stated. 5/ See table 28 for data on corn sugar and corn syrup. 6/Based on census data. In recent years approximately 50 percent of cornmeal was degenerated. 7/ Principally oatmeal but includes an allowance for ready-to-eat cereals and infant foods. 8/Barley food products expressed in terms of malt equivalent. Includes malt and pearl barley. 9/Less than 0.05 pound. 10/Data no longer available. 11/Preliminary.

1/ Estimates are for the total population. Data in parentheses are approximation. 2/ Refined, measured at approximately wholesale level of distribution  
 3/ Includes syrup equivalent of maple sugar. 4/ Included in product weight of processed fruits and vegetables and sweetened condensed milk. Duplication with frozen dairy desserts avoided in the dairy statistics. 5/ Preliminary.

1/ Dry basis. Recent corn sweetener consumption may be under stated due to incomplete data. Excludes high-fructose. 2/ Sugar sweetened equivalent assumes saccharin is 300 times as sweet as sugar, and cyclamate is 30 times as sweet as sugar. 3/ Cyclamate food use was banned by the Food and Drug Administration in 1970. 4/ Preliminary.

1/ Data on U.S. Confectionery shipments, compiled from "Products and Product Classes-Quantity and Value of Shipments by all Producers" (including confectionery and chocolate-type confectionery for retail sale by chocolate manufacturers) reported in the 1958, 1963, 1967, and 1972 Census of Manufactures, "Sugar and Confectionery Products." SIC Industry Groups 2065 and 2066, NC-20F series, published infrequently by U.S. Dept. of Commerce, Bureau of the Census, Washington, D.C. Data for noncensus years keyed to trend of confectionery shipments reported in "Confectionery Shipments, Sales, Average Value and Per Capita Consumption, 1927-75," Confectionery Manufacturers' (Annual) Sales and Distribution (Surveys), 1975, U.S. Dept. of Commerce, Domestic and International Business Administration, Washington, D.C., June 1976, p. 14. 2/ Data from U.S. Dept. of Commerce, U.S. Imports, FT-246, Statistical Classes, 156.3020, 157.1020, and 157.1040. 3/ Data from U.S. Dept. of Commerce, U.S. Exports, FT-410, Statistical Classes, 062.0015 and 073.0020. 4/ Calculated as a residual. Negatives indicate increases in stock level during year, positives signify net withdrawals. 5/ Domestic disappearance for food use. 6/ Quantity estimated by Economic Research Service, based on data from Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Dept. of Agriculture. 7/ Unit value times total use. 8/ Calculated from "Total Consumption of Selected Ingredients by the U.S. Confectionery Industry," reported annually in Confectionery Manufacturers' (Annual) Sales and Distribution (Survey), U.S. Dept. of Commerce, Domestic and International Business Administration, Washington, D.C. 9/ Preliminary.

1/ Data on U.S. Soft drink shipments, sales and unit values, computed from "Products and Product Classes-Quantity and Value of Shipments by all All Producers (Including soft drinks, carbonated waters, and single strength equivalent of flavoring extracts and sirups)" reported in the 1958, 1963, 1967, and 1972 Census of Manufacturers, "Beverages," SIC Industry Groups 2086, Soft Drinks and Carbonated Waters, and 2087, Flavoring Extracts and Sirups, Not Elsewhere Classified, MC-20H Series, published infrequently by the U.S. Dept. of Commerce, Bureau of the Census, Washington, D.C., Data for noncensus years keyed to trend of soft drink production reported in NSDA/1975 Sales Survey of the Soft Drink Industry, National Soft Drink Association, Washington, D.C., June 1976, p.16. 2/ Quantity estimated by Economic Research Service, based on data from Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Dept. of Agriculture. 3/ Unit value times total use. 4/ Annual average price of sugar delivered to U.S. confectionery manufacturers, from "Total Consumption of Selected Ingredients by the U.S. Confectionery Industry," reported annually in Confectionery Manufacturers' Sales and Distribution (Surveys), U.S. Dept. of Commerce, Domestic and International Business Administration, Washington, D.C., It is believed that this price paid by U.S. confectioners is a reasonable estimate of the average annual price of sugar used in soft drinks.

1/ Includes processed meat on fresh equivalent basis. Carcass weight converted to retail cut equivalent using factors indicated in table 7. 2/ Annual data. 3/ Edible offal excluded from carcass weight, included in retail equivalent data assuming equal distribution throughout the year. 4/ Preliminary.

1/ Quantities of nutrients computed by Agricultural Research Service, Consumer and Food Economics Institute, on the basis of estimates of per capita food consumption (retail weight), including estimates of produce of home gardens, prepared by the Economic Research Service. No deduction made in nutrient estimates for loss or waste of food in the home, use for pet food, or for destruction or loss of nutrients during the preparation of food. Civilian per capita only, 1941 to date. Data include iron, thiamin, riboflavin, and niacin added to flour and cereal products; other nutrients added primarily as follows: vitamin A value to margarine, milk of all types, milk extenders; vitamin B<sub>6</sub> to cereals, meal replacements, infant formulas; vitamin B<sub>12</sub> to cereals; ascorbic acid to fruit juices and drinks, flavored beverages and dessert powders, milk extenders and cereals. Quantities of added nutrients for 1960-66 were estimated in part by Consumer and Food Economics Institute.

2/ Preliminary.

Table 39--Percentages of total nutrients contributed by major food groups, selected periods 1/

1/ Percentages were derived from nutrient data which include iron, thiamin, riboflavin, and niacin added to flour and cereal products; other nutrients added primarily as follows: Vitamin A value to margarine, milk of all types, milk extenders; vitamin B<sub>6</sub> to cereals, meal replacements, infant formulas; vitamin B<sub>12</sub> to cereals; ascorbic acid to fruit juices and drinks, flavored beverages and dessert powders, milk extenders and cereals. Quantities of added nutrients for 1960-66 were estimated in part by Consumer and Food Economics Institute. 2/ Components may not add to total due to rounding. 3/ Includes tomatoes. 4/ Includes coffee and chocolate liquor equivalent of cocoa beans and fortification not assigned to a specific food group. 5/ Less than 0.05 percent. 6/ Preliminary.

Table 40--Per capita consumption of food, by major groups, 1960-75 1/

1/ Summary of quantity data used in the nutrient calculations; equivalent to the retail store level of distribution. Groupings match those in table 39. Data are the same as those in table 6 except fruit and vegetable groupings differ, spices are omitted; and concentrated fruit juices are on a single-strength basis. 2/ Excludes game birds. 3/ Edible-weight basis. Includes game fish, approximated at 2.9 pounds in 1960 and 3.0 pounds thereafter. 4/ Milk equivalent based on calcium content. One quart of fluid milk weighs 2.15 pounds. 5/ Product weight except for concentrated citrus juices which are on a single-strength equivalent. 6/ Includes fruit baby food. 7/ Preliminary. 8/ Includes baby foods. 9/ Includes vegetable soups. Tomato soup estimated to constitute 20 percent of the total soups shown in table 24; other vegetable soups, 40 percent. 10/ Retail weight except for dehydrated products and chips and shoestrings which are fresh-weight equivalent.

1/ Includes products converted to carcass weight equivalent. Edible offals are not part of carcass and therefore not included.  
 2/ Cold-storage holdings in public warehouses and packing plants. Product weight as reported by SRS assumed to be equivalent to carcass weight.  
 3/ Total supply less ending stocks.  
 4/ Exports and shipments of veal are not reported separately; estimates obtained as a constant percentage of total beef and veal.  
 5/ Preliminary.

1/ Canned includes production in Puerto Rico and American Samoa. 2/ Processed in the United States from imported fish and shellfish. Data for cured fish estimated. 3/ Canned fish stock data include reported or estimated stocks for salmon, tuna, sardines, and mackerel. Maine sardines and, since 1966, salmon stocks include those at the wholesale level. 4/ Total supply less ending stocks. 5/ Edible weight of finfish equal to 45 percent of liveweight; shellfish reported on meat-equivalent basis. 6/ Preliminary. 7/ Excludes the nonfish content of canned fishery products. 8/ Excludes intermediate products which may be in the final stage of processing, including mild cured salmon and green salted cod, haddock, hake, pollock, and cusk.

6/ Includes data for apples produced in commercial areas only.										

1/ Data include apples in controlled atmosphere storage beginning 1963; pears included in all years; and grapes included beginning 1953. 2/ Total supply less ending stocks. Differences between ending stocks of one year and beginning stocks of the following year are caused by change in source of data and coverage. 3/ Includes oranges, grapefruits, lemons, limes, tangerines, and beginning 1955-56 crop year, tangelos. Crop years beginning October or November of year prior to those indicated. 4/ Preliminary. 5/ Includes apricots, avocados, bananas, cherries, cranberries, figs, grapes, nectarines, peaches, pears, pineapples, plums and prunes, and strawberries. Beginning 1960, includes papayas. Excludes portion of fresh Mexican pineapple imports processed in the United States. 6/ Includes data for apples produced in commercial areas only.

1/ Includes apples, applesauce, apricots, berries, cherries (including brined), cranberries, figs, fruit cocktail and salad including mixed fruits, citrus sections and salad, olives (including brined), peaches (including spiced), pears, pineapple, and plums and prunes.

2/ Receipts of pineapple from Hawaii are based on deliveries from the industry.

3/ Includes portion of Mexican fresh pineapple processed in U.S. 1960-67.

4/ Years noted indicate differences exist between ending stocks in one year and beginning stocks in the next year, due to changes in coverage of available data.

5/ Total supply less ending stocks. See footnote 4.

6/ Preliminary.

1/ Citrus juices are on a pack year basis beginning October or November prior to year indicated. Include concentrated citrus juices on a single-strength basis.

2/ Receipts of pineapple from Hawaii are based on delivery data from the industry; pineapple deliveries are included in production. Imports include portion of Mexican fresh pineapple processed in U.S., 1960-67.

3/ Includes only wholesale distributors' stocks of pineapple juice. Stocks of California concentrated citrus juice not available since 1959; beginning 1963, estimated quantities are no longer included. Differences, where noted, between beginning stocks in one year and ending stocks in the previous year arose from changes in coverage of available data.

4/ Total supply less ending stocks. Differences between ending stocks and beginning stocks are caused by changes in sources of data and coverage (see footnote 3).

5/ Preliminary.

1/ Includes apples, apricots, dates, figs, peaches, pears, prunes, raisins, currants and other dried grapes. Excludes unmerchantable figs and substandard prunes.

2/ Excludes quantities used for juice and concentrate from total prune production.

3/ September-August year.

4/ Total supply less ending stocks.

5/ Less than 0.5 million pounds

6/ Excludes 14,000 tons (dried weight) of rain-damaged raisins.

1/ Includes all vegetables grown primarily for fresh sale, except melons, potatoes and sweetpotatoes. Excludes produce of farm and nonfarm home garden. 2/ Estimated total commercial production for all States and for all vegetables for fresh market, including greenhouse production. For a few crops, includes production for processing. See note 7. 3/ Includes shipments from Puerto Rico. 4/ Includes onions (including cold storage stocks) and New York cabbage. 5/ Total supply less ending stocks. 6/ Includes small quantities of melons shipped to territories. 7/ Includes miscellaneous vegetables for processing which are not covered in the reported data on commercial production for processing. Includes shrinkage and loss after harvest for onions only. Nineteen seventy-one includes dehydrated onions. 8/ Preliminary.

1/ Total supply less ending stocks. Differences in ending stocks of 1961 and beginning stocks of 1962 are caused by inclusion in 1962 of potato stocks in warehouses not previously reported. 2/ Includes asparagus, snap beans, lima beans, broccoli, Brussels sprouts, carrots, cauliflower, corn (cut-corn equivalent), kale, okra, blackeye peas, green peas, rhubarb, spinach, pumpkin, squash, turnip greens, and miscellaneous vegetables (including sweetpotatoes). Excludes potato products. 3/ Preliminary.

1/ Includes merchantable stocks in hands of growers and local dealers in areas where produced plus estimated farm use and shrinkage after January 1. 2/ Total supply less ending stocks. 3/ Includes the farm-weight equivalent of dehydrated potatoes. 4/ Farm-weight equivalent. 5/ Includes quantities used for starch, glucose, and alcohol. 6/ Data include the farm-weight equivalent of dehydrated potatoes and potato flour. 7/ Includes farm-weight equivalent of potatoes used in mixtures, flour, dehydration, chips and shoestring potatoes. In recent years, these uses have amounted to about 21 percent of the totals shown. Excludes quantities used for canned potatoes, which are included with processed vegetable data. 8/ Production includes some quantities left in the ground because of low prices. These quantities are included in "feed, seed, waste, and nonfood." 9/ Less than 50,000 hundred-weight.

10/Preliminary.

1/ Estimated. Includes commercial stocks for sale as of January 1, quantity for seed from previous crop, and 40 percent of the farm home consumption of the previous crop year as farm-held supplies for following months. 2/ Total supply less ending stocks. 3/ Farm-weight equivalent of canned sweetpotatoes. 4/ Estimates based on reported feed and waste for crop years. Since 1953 have assumed 65 percent occurred before January 1. 5/ Excludes canned potatoes which are included with processed vegetable data.

1/ Deliveries by primary distributors for consumption in the United States can be derived by adding the net change in invisible stocks to (processors and importers). 2/ Data from fruit and vegetable Division, AMS. 3/ Stocks in hands of primary distributors as a residual. 4/ Holdings of wholesalers, retailers, and industrial users. Minus sign means a withdrawal from stocks. 5/ Calculated 0.934570. 6/ Preliminary.

1/ Production in preceding year minus estimated quantity used for seed. Beginning 1964, estimates based on limited information. 2/ California only.  
 3/ Imports for consumption of specified ground and unground condiments as reported by the Department of Commerce minus exports of duty-free foreign spices.  
 "Other spices" includes imports of ground cinnamon, cloves, ginger root, nutmeg and pepper where not individually reported. Since 1963 excludes exports of foreign spices, since these items are not individually reported. 4/ Cassia, cassia buds, and cassia vera. 5/ Includes stems. 6/ Excludes sesame seed crushed for oil. 7/ Includes cardamom seeds, curry and curry powder products, fenugreek seeds, laurel (bay) leaves, marjoram, origanum, thyme, mixed spices, other spices and spice seeds, and certain ground spices (see footnote 3). Beginning 1964, also includes basil, capers, dill mint leaves, parsley, rosemary, and savory. Since 1963 exports of foreign spices are not individually reported, thus are deducted from "other spices." Includes shipments from Territories beginning 1965. 8/ Preliminary.

1/ Quantities of farm products weighted by average 1967 farm prices. Includes Alaska and Hawaii beginning in 1966. All quantities of wheat, rye, rice and buckwheat counted as food, other grains as nonfood. Oilseeds other than peanuts assigned to nonfood. Insignificant amounts of butter marketings are included with home consumption. Oils other than peanut oil assigned to nonfood separately. 3/ Includes cucumbers, lettuce, and tomatoes grown under glass and melons. 4/ Excludes honey in addition to groups shown separately. 5/ Includes popcorn, peppermint, and spearmint in addition to groups shown separately. 6/ Includes corn in 1960 and cowpeas. 7/ Use of non-broomcorn, hops, beeswax, wool, mohair, turkey hatching eggs. 8/ Excludes peanuts. 9/ In addition to groups shown separately, includes

Veal cutlets 1/	Lb.	343.0	323.5	Peppers, green	Lb.	56.0	60.2
Pork chops	Lb.	156.5	185.6	Spinach	10 oz.	48.4	55.2
Lion roast	Lb.	116.6	141.3	Tomatoes	Lb.	54.8	57.8
Pork sausage	Lb.	114.1	143.3	Processed fruits and vegetables			
Ham, whole	Lb.	105.4	123.9	Fruit cocktail	#303 can	40.8	46.2
Picnic ham	Lb.	80.2	90.3	Pears	#2½ can	65.2	74.8
Bacon	Lb.	132.0	175.6	Peaches	#2½ can	52.2	59.2
Lamb chops 1/	Lb.	220.6	271.1	Pineapple-grapefruit juice drink	16-oz can	43.7	54.3
Frankfurters	Lb.	114.5	119.3	Orange juice concentrate, frozen	6-oz. can	25.8	28.2
Ham, canned	Lb.	168.1	193.7	Lemonade concentrate, frozen	6-oz. can	17.2	23.0
Bologna sausage	8 oz.	75.7	79.8	Beets	#303 can	28.1	33.0
Salami sausage	8 oz.	90.2	89.3	Corn	#303 can	29.5	37.9
Liver sausage	8 oz.	71.8	73.3	Peas, green	#303 can	32.2	39.2
				Tomatoes	#303 can	29.8	35.3
<u>Poultry</u>							
Frying chicken	Lb.	56.0	63.3	Dried beans	Lb.	69.1	42.1
Chicken breasts	Lb.	98.5	109.9	Broccoli, frozen	10 oz.	36.8	41.6
Turkey	Lb.	72.7	72.6	Pea, frozen	10 oz.	29.0	33.4
<u>Eggs</u>							
Eggs, grade A, large	Doz.	78.3	77.0	Cereal and bakery products			
				Flour, white	5 lb.	102.5	99.4
				Cracker meal	9½ oz.	50.2	62.5
				Corn flakes	12 oz.	41.5	51.9
<u>Fish</u>							
Shrimp, frozen	10 oz.	149.4	160.8	Rice, short grain	Lb.	44.0	41.0
Ocean perch, fillet, frozen	Lb.	108.1	112.6	Rice, long grain	Lb.	51.6	47.0
Haddock, fillet, frozen	Lb.	149.4	151.6	Bread, white	Lb.	34.5	36.0
Tuna fish	6½ oz. can	57.7	60.3	Bread, whole wheat	Lb.	52.7	57.4
Sardines	4-oz. can	40.1	49.8	Cookies, cream Filled	Lb.	73.5	94.0
<u>Dairy products</u>							
Milk, fresh, grocery	1 gal.	78.4	78.5	Sugar and sweets			
Milk, fresh, skim	Qt.	41.2	42.4	Sugar	5 lb.	161.7	186.2
Milk, evaporated	14½-oz can	28.8	30.8	Grape jelly	10 oz.	45.2	61.2
Ice cream	½ gal.	107.6	122.2	Chocolate bar	1 oz.	9.8	12.5
Cheese, American process	8 oz.	72.9	76.8	Syrup, chocolate flavored	16 oz.	36.5	48.0
Butter	Lb.	94.6	102.5				
<u>Fats and oils</u>							
Margarine	Lb.	57.4	62.9	Nonalcoholic beverages			
Shortening	3-lb. can	179.0	187.3	Coffee	1-lb. can	122.9	133.4
Salad dressing, Italian	8 oz.	48.2	58.2	Coffee, instant	6 oz.	158.5	160.3
Salad or cooking oil	24 oz.	106.8	116.3	Tea bags	pkg. of 48	72.0	87.5
Peanut butter	12-oz. jar	61.1	68.0	Cola drink	ctn., 72-oz.	108.9	132.8
				Carbonated fruit drink	ctn., 72-oz.	95.7	115.2
<u>Fresh fruits and vegetables</u>							
Apples	Lb.	34.3	34.0	Prepared and partially prepared food			
Bananas	Lb.	18.4	23.2	Bean soup	11½-oz can	24.5	27.3
Lemons	Lb.	42.0	47.3	Chicken soup	10½-oz can	22.3	23.2
Oranges, size 200	Doz.	111.4	114.8	Spaghetti	15½-oz can	23.3	26.7
Orange juice, fresh	Qt.	50.4	53.0	Mashed potatoes, instant	7 oz.	50.8	55.7
Grapefruit, size 80	Each	19.8	21.7	Potatoes, French fried, frozen	9 oz.	22.3	25.6
Grapes, seedless 2/	Lb.	65.6	66.4	Baby foods	4½ oz.	14.1	16.4
Strawberries 2/	Pt.	55.0	55.8	Sweet pickle relish	12 oz.	48.9	57.7
Watermelon 2/	Lb.	11.2	10.6	Pretzels	10 oz.	53.3	61.8
Potatoes	10 lb.	166.4	134.4				

1/ U. S. Choice.

2/ Priced only in season.

Homeownership	16.335	48.377	Special groups		
Fuel and utilities	5.002	14.832	Commodities		
Fuel oil and coal	1.028	3.044	Durable	63.762	100.000
Gas and electricity	2.548	7.546	Nondurable	15.729	24.657
Other utilities	1.432	4.241	Services	48.040	75.343

1/ Changing importance of items occurs each month as result of variation in price movements among items. Only data for December are regularly published. Most recent revision of quantity weights was made in December 1963 to reflect the spending pattern of wage earner and clerical worker families as derived from the 1960-61 Surveys of Consumer Expenditures. For the first time, the buying pattern of one-person families was incorporated and a modified random sampling procedure was used for item selection. May not add precisely due to rounding. 2/ Not actually priced; imputed from priced items.

1966	101	106	98	41	1974	162	178	152	43
1967	100	100	100	39	1975 2/	174	187	165	42

1/The market basket contains the average quantities of U.S. farm-originated food products purchased annually per household in 1960 and 1961 by wage-earner and clerical-worker families and single workers living alone. The farm value is the return to farmer for the farm products equivalent to foods in the market basket. The farm-retail spread is the difference between the retail cost and farm value. 2/Preliminary.

Farm-Retail Spreads for Food Products, Misc. Pub. 741, table 3, and recent issues of the Agricultural Outlook.

1/ Expenditures represent the market value to consumers of all domestic farm foods bought by civilian consumers in this country. Farm value is adjusted to eliminate imputed value of nonfood byproducts. The marketing bill is the difference between the farm value and expenditures. Data for 1947-59 are published in MTS-174, August 1969.

2/ Preliminary. Commodity groups may not add to totals due to rounding.

3/ Farm value of bakery products group includes farm values of flour, milk, eggs, fruit; lard, vegetable shortening, and sugar used in bakery products. Farm values of these ingredients are not included in farm values of other product groups.

The following tables, which contain data from the 1960-61 Survey of Consumer Expenditures and the 1965-66 nationwide Household Consumption Survey, are not reprinted here.

Table 112	Food expenditures and income, by family size, utilization, and region, 1960-61
Table 113	Per capita income and food expenditures of nonfarm families and single consumers, by family income, family size, and region, 1960-61
Table 114	Changes in household use of food, 1955 to 1965
Table 115	Money value of food per capita, by income group, urbanization, and region, one week in spring of 1965
Table 116	Household expense for food away from home, spring 1965
Table 117	Food and beverage sales by kind of business, retail trade, 1965

Table 118.--Population: Total and civilian United States 1960-75 1/

:	Total, including		Civilian	
	Armed Forces overseas	:	January 1	July 1
January 1	:	July 1	:	July 1
-----Millions-----				
1960	179.4	180.7	176.8	178.1
1961	182.3	183.7	179.7	181.1
1962	185.2	186.5	182.4	183.7
1963	188.0	189.2	185.3	186.5
1964	190.7	191.9	187.9	189.1
1965	193.2	194.3	190.5	191.6
1966	195.5	196.6	192.6	193.4
1967	197.7	198.7	194.4	195.3
1968	199.8	200.7	196.4	197.1
1969	201.8	202.7	198.3	199.1
1970	203.8	204.9	200.5	201.7
1971	206.1	207.0	203.1	204.2
1972	208.1	208.8	205.5	206.5
1973	209.7	210.4	207.3	208.1
1974	211.2	211.9	209.0	209.7
1975	212.7	213.5	210.6	211.4
:				

1/ Reflects revisions based on the 1970 Census of Population. Not adjusted for underenumeration. In computing per capita food consumption on a calendar-year basis, July 1 population was used. Military takings were deducted from total domestic consumption for most commodities and per capita figures were computed using the civilian population.
